We are one of 34 Conservation Districts in the State and three in Fremont County. We are the largest and only district in the county that does not have a mill levy. We are the local voice for conservation of our natural resources. We are led by a five member Board of Supervisors who are elected by the citizens in our district.

The current board members are (left to right): J. W. Hendry (rural), Gavin Woody (rural), Ron Lucas (at-large), Terry Hayes (urban), and Rod Rivers (rural). Supervisors serve without pay for staggered, four year terms.

HOW MUCH WILL THE MILL LEVY COST?

For a property with a Fair Market Value of $100,000, the mill levy would cost $9.50 per year or $0.79/month.

For a property with a Fair Market Value of $250,000, the mill levy would cost $23.75/year or $1.97/month.

For a property with a Fair Market Value of $500,000, the mill levy would cost $47.50/year or $3.95/month.

Through Federal, State and Local funding as well as private funding and in-kind work, the Lower Wind River Conservation District has help contribute more than $10 million to natural resource conservation in the past 15 years.

For the cost of a cup of coffee you can help conserve our resources, provide economic opportunities and an enhanced quality of life in your Lower Wind River Conservation District.

HOW WILL THE MILL LEVY BE USED?

Be the local voice for conservation issues

- Expand water quality monitoring program
- Work to get listed streams delisted
- Implement sustainable best management practices
- Expand the free water well testing program
- Establish a cost share program for soil and water conservation projects
- Assist citizens in planning and planting windbreaks
- Continue selling trees and shrubs for windbreaks and conservation
- Assist with community tree plantings

- Teach youth and adults about proper tree planting and care
- Maintain our manager position
- Work with the Natural Resources Conservation Service on natural resource projects
- Host rural and urban living workshops for small acreage owners
- Maintain a local voice and input into local, state and federal actions affecting natural resource use and management
- Work with elected officials on issues affecting citizens' health and welfare
- Work with citizens and other agencies to control invasive species

CONSERVATION = WISE USE OF OUR NATURAL RESOURCES

- Help develop wildlife habitat
- Host gardening, soil health and water quality educational events
- Continue Rangeland Monitoring
- Help develop grazing management plans
- Increase communication about available natural resource programs
- Expand youth educational programs
- Continue to complete soil reviews for proposed subdivisions
